

# Draft One

## REWRITE REPORT WRITING

Draft One force multiplies agencies and saves officers multiple hours every week by automatically drafting police report narratives based on body-worn camera audio. Safeguards ensure that every report is reviewed and approved by a human officer, ensuring accuracy and ownership of the information. With Draft One, your officers spend less time writing reports and more time on what matters.

“I’m absolutely **stunned by the quality** of the reports.  
It’s the most exciting piece of technology I’ve seen in years.”

— SERGEANT BOB YOUNGER, FORT COLLINS PD

## BENEFITS

### / FORCE MULTIPLY YOUR OFFICERS

During a time when many agencies are struggling with staff shortages, Draft One is a true force multiplier. For every eight officers who save an hour per shift on paperwork, your agency gains the equivalent of an extra eight-hour shift in the field.

### / INCREASE OFFICER RETENTION AND DECREASE BURNOUT

Too many tedious tasks lead to overtime hours worked, burnout and resignations. With Draft One, your officers will spend less time on paperwork and more time doing meaningful work out in the community.

### / GENERATE HIGHER QUALITY REPORTS

Improve the quality of your agency’s reports with consistent grammar, spelling and clarity. Provide concise summaries for supervisors, the justice system and other key reviewers.

### / IMPROVE RESPONSE TIMES AND CLARITY DURING CALLS FOR SERVICE

Less time writing reports means more time for responding quickly to calls for service. Since reports are drafted from body-worn audio, officers are motivated to record all interactions and speak with clarity to community members.

### / ENHANCE OFFICER SAFETY

Writing reports in the field can reduce your officers’ situational awareness. With Draft One, your officers spent less time focused on their devices, reducing their time in a vulnerable position and enhancing officer safety.

## FEATURES

### / ETHICS-FIRST DESIGN

Axon is adamant about ethics and the responsible development of AI. Draft One and the safeguards we put in place were developed in partnership with the Ethics & Equity Advisory Council (EEAC), and rigorously evaluated for word choice selection, draft quality and racial bias.

### / RAPID AUDIO UPLOAD AND TRANSCRIPTION

Audio from Axon body-worn camera (BWC) footage is uploaded over LTE and transcribed automatically so report drafts are available within five minutes of an incident ending.

### / BWC AUDIO-ONLY INPUT

The AI technology will only leverage information from body-worn cameras to draft the narrative; encouraging officers to be more verbal and ensuring the draft narratives are built entirely from the evidence.

### / RESTRICT BY INCIDENT TYPE

Agencies can restrict Draft One usage by incident type, charge level, or whether an arrest was made.

### / DATA SECURITY

Agency data is always secured within the encrypted Axon Network; no transcripts or reports will be shared outside of your agency.

### / USE MULTIPLE BWC RECORDINGS

Officers can select multiple body-worn recordings to create a single draft report narrative.

### / REQUIRED HUMAN REVIEW AND SIGN OFF

Officers must review their reports, fill in the blanks and sign off on the accuracy of each report before submitting.

### / OFFICER TRAINING

Training resources and prompts are integrated throughout the Draft One application and available in Axon Academy.

### / AUDITABLE

A record is kept of events to track generated drafts and officer sign-off.

### / AXON EVIDENCE INTEGRATION

Generate and edit report drafts inside the Axon Evidence report-writer tool and then easily copy to your third-party RMS.

### / AXON RECORDS INTEGRATION

Insert report narratives into your report with a single click through the advanced integration with Axon Records.

### / COMPATIBLE WITH YOUR THIRD-PARTY RMS

Draft One works side-by-side with many different Record Management Systems, so your officers can easily insert reports into your agency's RMS solution.
